Facial Steamer (SUFA2)

Version 1.1

Facial Steamer (SUFA2)

Facial steaming is one of the most beneficial spa beauty treatments for skin health and overall skin condition.
Atomised steam cleanses the skin, opening the skin pores to help eliminate toxins, residual make-up and daily grime.

Facial Steamer (SUFA2)

Getting started

STEP 1 Ensure that your Facial Steamer is placed on a flat surface. Pull the water chamber upwards to remove from the water inlet.

STEP 2 Unscrew the cap and fill the water chamber with 120ml of water, ensure that the water level does not exceed this.

Note: The use of filtered or distilled water is recommended.

STEP 3 Firmly re-attach the cap and push the water chamber fully back into the water inlet.

STEP 4 Remove any make up and rinse your face well.

Facial Steamer (SUFA2)

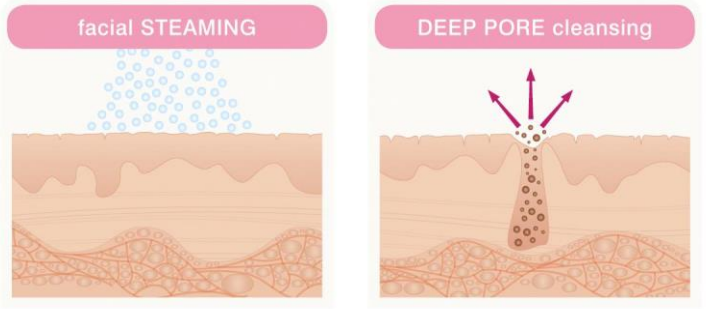
Instructions for use

STEP 1 Adjust the angle of the mist nozzle to direct the steam onto the desired area of your face during treatment. NOTE: The mist nozzle only adjusts up and down and not side to side.

STEP 2 Insert the mains plug into your power supply and turn on the power button, the indicator light will illuminate red. NOTE: The steamer will take approx 1 minute to heat up before any steam is produced.

STEP 3 Place your face no closer than 10cm away from the mist nozzle. NOTE: We recommend five treatments per week, each treatment lasting no longer than ten minutes.

STEP 4 To finish rinse your face with cold water and pat dry.



Facial Steamer (SUFA2)

After use

STEP 1 Turn the unit off by pressing the power button and remove the mains plug from your power supply. Allow the unit to cool for 30 minutes.

STEP 2 Remove the water chamber, unscrew the cap and pour water out. Note: Ensure that you have emptied any water from the water inlet.

STEP 3 Open the water chamber plug on the base of the unit and pour out any remaining water.

STEP 4 Re-attach the cap and push the water chamber fully back into the water inlet.
